

AYUSH SINHA

Software Engineer · React.js · TypeScript · Node.js · REST APIs · Cloud Security

+91-8434488554 | sinhaayush20010310@gmail.com | Pune, Maharashtra (Remote / Relocation) | linkedin.com/in/ayushsinha781 | github.com/sinhaayush20010310-commits

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building scalable React.js frontends and Node.js/Express.js backends, with a strong focus on intuitive UI development, RESTful API integration, and enterprise-grade application state management. Delivered a live production e-commerce platform leveraging CI/CD pipelines, JWT authentication, and Docker. Familiar with AWS services (S3, Lambda, ECS) and cloud-native observability practices. Passionate about AI-powered products, micro-frontend architectures, and automated testing (Jest, React Testing Library, Cypress). Thrives in Agile/Scrum teams with transparent, no-blame engineering cultures.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3

Frontend: React.js (hooks, state management, memoisation, re-render optimisation), Next.js, Tailwind CSS, Framer Motion, Responsive Design (320px-1440px), Webpack, Babel, Yarn

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Rate Limiting, Middleware, Input Validation, MVC, WebSockets, Async/Await

Databases: PostgreSQL (joins, indexes, schema migrations, query optimisation), MongoDB, MySQL, Mongoose ORM

Testing & QA: Jest, React Testing Library, Cypress, Unit Testing, Code Reviews, Pull Requests

Cloud & DevOps: AWS (S3, DynamoDB, Lambda, ECS, CodeBuild), Docker, CI/CD Pipelines, Vercel, Netlify, GCP / Azure (familiar), Terraform (familiar)

Practices: Micro-Frontend Architecture, SOLID Principles, Agile/Scrum, Technical Documentation, Monitoring & Observability, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Support Associate — Enterprise Systems

Tech Mahindra, Noida

Apr 2025 - Feb 2026

- Automated reporting workflows using JavaScript and Node.js scripts, reducing manual effort by ~30% and improving team throughput.
- Resolved 50+ monthly escalations via structured debugging; maintained 98%+ SLA compliance across enterprise deployments.
- Supported production deployments and post-release monitoring; authored technical runbooks for cloud-hosted environments.
- Participated in code reviews, enforcing clean-code and design-pattern best practices within shared development workflows.

Software Development Trainee

JSpiders Training & Development Centre, Noida

Aug 2023 - Aug 2024

- Built and consumed RESTful APIs with Node.js & Express.js; integrated PostgreSQL and MongoDB for data persistence.
- Developed full-stack features — React.js frontend + Node.js/Express.js backend — within Agile/Scrum sprint cycles.
- Implemented JWT authentication, rate limiting, middleware chains, and error-handling in Express.js applications.
- Applied MVC architecture, SOLID principles, and Git/GitHub source control and pull-request workflows across all projects.

AI Code Quality Evaluator (Freelance)

Outlier — Remote

Oct 2024 - Feb 2025

- Reviewed 100+ JavaScript/TypeScript/Node.js code submissions for correctness, security, and RESTful API design quality.
- Identified async/await pitfalls and edge cases; feedback directly improved AI-powered LLM training output quality.

KEY PROJECTS

Medical E-Commerce Platform — pritampharmacy.vercel.app

React.js · Next.js · Node.js · Express.js · PostgreSQL · MongoDB · JWT · REST APIs · Docker · CI/CD · Vercel · Tailwind CSS

- Shipped a full production web app: responsive React.js/Next.js frontend (320px-1440px) with optimised re-renders and component state management.
- Node.js/Express.js RESTful API backend with JWT authentication, rate limiting, input validation, and structured error handling.
- Designed PostgreSQL schema migrations; improved query performance using indexes and query analysis tools.
- Deployed via CI/CD pipeline on Vercel; integrated monitoring and observability practices for post-release stability.

Developer Portfolio Website — portfolio-ruby-one-n717j8qaek.vercel.app

React · TypeScript · Vite · Tailwind CSS · Framer Motion · Node.js · Express.js · MongoDB · JWT

- Built and deployed a full-stack developer portfolio with animated sections (Hero, About, Skills, Experience, Projects, Contact) using React, TypeScript, and Framer Motion.
- Implemented dark-mode theming, smooth-scroll navigation, and a keyboard-accessible command palette (Ctrl+K) for fast in-app navigation.
- Developed a Node.js/Express.js REST API with MongoDB and JWT-protected routes to manage projects, skills, experience, and contact-form submissions.
- Deployed frontend on Vercel with a CI/CD-driven build pipeline; designed for full responsiveness from mobile to ultrawide displays.

WeatherNow App

React.js · TypeScript · Node.js · OpenWeatherMap REST API · Tailwind CSS

- Consumed third-party REST API via Node.js proxy with TypeScript type safety; dynamic UI with automated error-handling flows.

EDUCATION & CERTIFICATIONS

B.Tech, Madhyanchal Professional University, Bhopal

2020 - 2023

Full-Stack Web Development Certificate, JSpiders Training & Development Centre, Noida

2023 - 2024

AI Code Quality Evaluation, Outlier (Freelance)

2024 - 2025
